Auburn Lakes Community Update: Projects Status
Monday, March 13, 2023
(sent via e-blast)

Dear Valued Confluence Rivers Customer:

We are pleased to share some updates with you on the projects we have planned for the Auburn Lakes community. These plans include upgrading your treatment water storage tank which will help meet the needs of your growing subdivision. Converting the current tank to a ground storage tank will increase available water storage capacity. We have requested, and received this past Friday from the MO DNR, an emergency construction permit for this project which means we will start working on converting the tank and continue this activity through 2023. We have also placed orders for new flushing hydrants and anticipate installing them by July of this year.

We appreciate your patience as we work to fulfill our mission of delivering safe, reliable, and environmentally responsible water to the Auburn Lakes community.

Sincerely,

Confluence Rivers Utility Operating Company
