

*****IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER*****

**Gadsden Water (AZ0414037) Yuma, County
Total Coliform Monitoring Requirements Not Met January 2024**

On **2/20/2024** we became aware that our system recently failed to collect the correct number of drinking water samples. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During January 2024 we did not monitor or test for Total Coliform Bacteria (& E. Coli) and therefore cannot be sure of the quality of your drinking water during that time.

What should I do?

There is nothing you need to do at this time. You do not need to boil your water or take other corrective actions. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What is being done?

To avoid any more missed samples, we have reviewed and implemented procedures to ensure that all required samples are collected.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
