

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Citrus Park (AZ0414107), Yuma, Arizona
Monitoring Requirements Not Met for March 2025

Our water system violated drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards.

During **March 2025** we failed to collect a sample and perform an analysis for **Total Coliform** and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for, how often we are supposed to sample and how many samples we are supposed to take; how many samples we took; when samples should have been taken; and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were taken
Total Coliform	1 sample each Month	0	March 2025	April 2025

We are taking the following actions to address this issue:

We have reviewed procedures and taken steps with the system operators to ensure that all required samples are collected to meet all regulatory requirements.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
