

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Rancheros Bonitos (AZ0414073), Yuma County, Arizona

Has Levels of Uranium Above Drinking Water Standards

Our water system has recently violated a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we did (are doing) to correct this situation.

We routinely monitor for the presence of drinking water contaminants. We received notice that the sample collected on 03/18/2025 showed that our system slightly exceeds the standard, or maximum contaminant level (MCL), for Uranium. The standard for Uranium is 30µg/L (30 micrograms/Liter) The average level of Uranium over the last year has been 36.7 µg/L.

What should I do?

There is nothing you need to do. **You do not need to boil your water** or take other corrective actions. However, if you have specific health concerns, consult your doctor. If you have a severely compromised immune system, have an infant, are pregnant, or are elderly, you may be at increased risk and should seek advice from your health care providers about drinking this water.

What does this mean?

This is not an emergency. If it had been, we would have notified you, within 24 hours. However, some people who drink water containing Uranium in excess of the MCL over many years may have an increased risk of getting cancer.

We are taking the following actions to address this issue:

We are working to design and construct a treatment system located at the water plant to treat and remove Uranium levels so that they are below the maximum contaminant level of 30 ug/L. In the meantime, we have provided you (at no cost) access to an alternate source of water from a kiosk unit located just outside of the water treatment plant. Please contact our customer service team at 1 800 670 4869 if you have any questions about how to access the kiosk unit, or have questions regarding this notice.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
