

*****IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER*****

**North University Estates (TX1520159), Lubbock County, TX
Monitoring and Reporting Violation for Chemical Sampling 2023**

NORTH UNIVERSITY ESTATES PWS ID 1520159 has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Public water systems are required to collect and submit chemical samples of water provided to their customers and report the results of those samples to the TCEQ on a regular basis.

We failed to monitor and/or report the following constituent and Monitoring Periods:

Constituent	Monitoring Period
Nitrate	4Q2023
Synthetic Organics	2023
Volatile Organics	2023

Results of regular monitoring are an indicator of whether or not your drinking water is safe from chemical contamination. We did not complete all monitoring and/or reporting for chemical constituents, so TCEQ cannot be sure of the safety of your drinking water.

We are taking the following actions to address this issue:

CSWR – Texas Utility Operating Company (UOC) closed on this facility in October 2023. Upon acquisition CSWR – Texas UOC completed makeup samples for the missed monitoring and reporting requirements. All results were returned within an acceptable range and do not pose a risk to your drinking water.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
