

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Fremont Water (TX1330153), Kerr County, TX

Monitoring and Reporting Violation from June – Sept, 2021

FREMONT WATER (PWS 1330153) has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During (52) 2021, we did not monitor or test for LCR and therefore cannot be sure of the quality of your drinking water during that time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for [these contaminants], how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples were [or will be] taken.

Contaminant	Required sampling frequency	No. of samples taken	When samples should have been taken	When samples were or will be taken
<i>LCR Sample Tap 2021</i>	<i>5 / annually</i>	0	<i>June 1, 2021 – Sept 30, 2021</i>	<i>10/08/2022 RTC</i>

What is being done?

In order to return to compliance, we collected a complete set of samples, had them analyzed and sent the results to TCEQ. We returned to compliance as of 10/08/2022.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Fremont Water (TX1330153), Kerr County, TX
Monitoring and Reporting Violation from Mar, May, and June, 2021

Our system failed to collect every required coliform sample. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During MAR, MAY & JUNE 2021, we did not monitor or test for coliform bacteria and therefore cannot be sure of the quality of your drinking water during that time.

What should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, we are required to notify you within 24 hours.

What is being done? In order to return to compliance our system had to collect monthly distribution samples, take it to a lab to be analyzed and send the results to TCEQ. Those samples were collected and we returned to compliance as of 08/12/2021.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
