

BUILDING RELIABLE WATER AND WASTEWATER SERVICE FOR LOUISIANA

\$345 MILLION INVESTED ACROSS THE STATE

Magnolia is investing in stronger water and wastewater systems throughout Louisiana. These improvements - totaling \$345 million to date - protect public health, safeguard the environment, and support the growth of our communities.

REBUILDING SYSTEMS, STRENGTHENING SERVICE

Many of the systems Magnolia acquires are in poor condition. We work to bring them into compliance and restore reliable service. The updated rates reflected on this bill help ensure that we can continue making these essential upgrades, keeping safe, clean, and dependable water flowing for families and businesses.

AN INVESTMENT IN THE FUTURE

The new rates are effective September 2025 and are reflected on your current statement. You may view the updated rate schedule at magnoliawateruoc.com under the “Regulatory Information” section.

For more information on how Magnolia is transforming water and wastewater systems across Louisiana, visit the “Community Impact” section of our website to see examples of the improvements underway. You can also expect to see project updates included in upcoming billing inserts, highlighting continued progress as we transition from 2025 into 2026.
