

## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER Aransas Bay (TX0040018), Aransas County, TX

Aransas Bay Utility has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During Jan 1, 2024 and Dec 31, 2024 we did not monitor or test – or – did not complete all monitoring or testing for lead and copper tap samples and therefore cannot be sure of the quality of your drinking water during that time.*

The table below lists the contaminant we did not properly test for during the last year, how often we are supposed to sample for lead at consumer taps, how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples were taken.

| Contaminant                        | Required sampling frequency | Number of samples taken | When samples should have been taken | When samples were or will be taken                  |
|------------------------------------|-----------------------------|-------------------------|-------------------------------------|---|
| Lead and copper tap water sampling | 10 RT/ IYR                  | 9 RT                    | 6/1/24 – 9/30/24                    | <i>All required samples were collected in 2025.</i> |

### We are taking the following actions to address this issue:

CSWR-Texas collected the required number of lead and copper samples between January 1, 2025, and December 31, 2025. CSWR-Texas is closely monitoring all lead and copper sampling schedules to ensure that all samples are collected and analyzed within the required time frames going forward.

*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.*
