

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**  
**Antelope Water Co. AZ0414001 Yuma County**  
**Did not complete Lead Service Line Inventory by deadline**

All community water systems and non-transient non-community water systems were required to submit an initial service line inventory to the Arizona Department of Environmental Quality (ADEQ) by **October 16, 2024**. We failed to submit the initial lead service line inventory by the due date, but did submit it as required on March 16, 2026. As our customers, you have a right to know what happened and what we are doing to correct this situation.

*Service line inventories are the foundation from which water systems can take proactive steps to address lead service lines. Establishing an inventory of service line materials and identifying the location of lead service lines are key steps in getting them replaced.*

**What should I do?**

There is nothing you need to do at this time. The inventory has been submitted as required, and none of the service lines have been identified as lead or have any risk of lead contamination.

**What does this mean?**

This is not an emergency, as we have completed the process of preparing and submitting the initial lead service line inventory. However, we are required to tell you about this violation to ensure that we are open and transparent about this process.

**What is being done?**

The inventory has been submitted as required, and there is no further action needed at this time.

*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.*

This notice is being sent to you by Cactus State Utility Operating Company for the Cibola Public Water System ID#: AZ0414001.

**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**  
**Antelope Water Co. AZ0414001 Yuma County**  
**Did Not Meet Monitoring Requirements**

Our water system violated drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards.

During Q1 (Jan – Mar) and Q3 (July – Sept) 2025 we did not complete all monitoring or testing for contaminants in your water and therefore cannot be sure of the quality of our drinking water during that time.

**What should I do?**

There is nothing you need to do at this time.

The table below lists the contaminants we did not properly test for during the last year; how often we are supposed to sample and how many samples we are supposed to take; how many samples we took; when samples should have been taken; and the date on which follow-up samples were (or will be) taken.

<b>Contaminant</b>	<b>Required sampling frequency</b>	<b>Number of samples taken</b>	<b>When samples should have been taken</b>	<b>When samples were next taken</b>
Disinfection Byproducts (TTHM and HAA5)	2 samples in the first month of each quarter	0	January 2025	4/30/2025
Disinfection Byproducts (TTHM and HAA5)	2 samples in the first month of each quarter	0	July 2025	10/27/2025

**We are taking the following actions to address this issue:**

To prevent future sampling omissions, Cactus State Utility Operating Company (UOC) has reviewed and updated its internal sampling schedules to ensure all regulatory requirements are clearly identified and met. In addition, operational staff receive routine reminders of upcoming sampling deadlines to support timely compliance.
